

Copymoore Document Solutions ProductivityPack

We make it easy for you to get more out of our Solution

Copymoore Productivity Pack

The Copymoore Productivity Pack opens a range of fascinating possibilities and savings potential, making your workflows more productive, not testing your patience. Saving time, saving money and reducing frustration.

Increased productivity for your document workflow

Queue for the printer? Competing with colleagues for pole scanning position? Losing valuable time and your patience too? Those days are finally over. Send your print jobs to a central spooler and call them up from any output system using a PIN. With the Copymoore Productivity Pack..

Key Functions galore, one objective: increased productivity

In addition to Pull Printing, the Copymoore Productivity Pack offers a range of other great functions, including scanning menus that can be customised to meet the user's specific needs, a document reader with OCR function, multiple forwarding at the push of a button.

Pull-Printing for Maximum Flexibility

- Call up documents from any output system in the network via PIN.

Increased productivity for your document workflow

- Assign jobs to specific customer or project accounts.
- Flexibly allocate permissions (who can print in colour, for example.)

Multiple forwarding at the push of a button

- Easily forward documents to several recipients.
- Create scan workflows and link them to the customisable shortcuts on the MFP display.
- Automatic distribution of invoices, orders, delivery notes, etc.
- Minimise risk of manual errors; costly post-processing is a thing of the past.

Multiple forwarding at the push of a button

- Simply select the right workflow, enter the details and relax.
- Your multifunctional system scans the document, converts it to the desired format and then it's off.
